Dear Friends and Colleagues,

The American Dental Implant Association provides interesting and dynamic educational experiences for dental colleagues in an environment that encourages and supports personal friendships and fellowship. This meeting will allow you the opportunity to learn from experts and visionaries in the fields of surgery, periodontics, dental technology, and marketing.

Upon completion of this symposium, participants will be able to understand the cutting-edge surgical techniques, prosthetic techniques, graft materials and new products available in the field of implant dentistry!

We extend a warm welcome to all participants, their families and team members, and thank you for your support. This program will provide you and your team the opportunity to network, exchange information, find solutions, and socialize with colleagues, friends, and their families from around the country and around the world.

Our Team will be there to assist you further in your implant education and for you to experience Las Vegas’ superb entertainment, nightclubs, dining, shopping and sightseeing. Prepare for a fascinating, challenging, educational, and thoroughly enjoyable experience! We look forward to welcoming each and every one of you!

Sincerely,

Arun K. Garg, DMD
From the uninhibited to the unconventional, Mandalay Bay offers some of the most unique experiences on the planet — all without the expense of an around-the-world trip.
Implant Complications Management
Dr Leon Chen

Course Highlights

13 common complications and how to prevent or repair them.

- What to do if the implant is crooked.
- What to do if the implant is loose.
- What to do if the implant has exposed threads.
- What to do if the implant is too close to another implant.
- What to do if the implant is too close to a nerve.
- What to do if the implant has perforated the lingual plate.
- What to do if the implant has dropped into the sinus cavity.
- What to do if the implant has dropped into the nasal cavity.
- What to do if the oral sinus is opened
- What to do if sinus membrane is perforated.
- What to do if the sinus becomes infected.
- What to do if another doctor has announced the case is hopeless.
- What to do if the implant is fully integrated, but the patient is still in pain.

Many courses will talk about prevention of some of these problems, but no other course focuses on how to repair them. Dr. Chen has the experience to teach you how to take a complication and make it a success.

Course Objectives

After completing this course the clinician should be able to treat and manage various types of surgical, prosthetic, and peri-implantitis implant failures. The clinician should be able to recognize potential pitfalls of a particular case at the treatment planning stage to avoid potential complications. When complications arise, he or she will be able to determine the best solution to solve that problem either by repair, and/or by implant removal and re-implantation. This course also gives the clinician the ability to manage soft tissue around the implant to correct implant esthetic failures.
Hydraulic Sinus Condensing Technique®
Dr Leon Chen

Course Highlights

HYDRAULIC SINUS CONDENSING TECHNIQUE® (HSC) is today's premier technique for sinus augmentation. Less invasive than prior sinus augmentation techniques, HSC utilizes water pressure to prevent membrane perforation, with condensers to gently build up the sinus floor. This course will show you how to perform HSC in any situation, including cases with severely atrophic maxilla, septum presence and severely sloping sinus floors. You will also learn HSC with immediate implant placement and platform switching for initial stabilization. Never before has Sinus Condensing been so easy to perform and so easy on your patients. This course will open your eyes to the future of maxillary implant dentistry.

Course Objectives

This course is intended for those who would like to be able to place dental implants under the maxillary sinus. Various methods of sinus augmentations are discussed. However, this course will focus primarily on the Hydraulic Sinus Condensing technique developed by the lecturer. This technique is taught step by step with the armamentarium required for the procedure. Possible membrane perforation management is discussed as well as other possible complications and how to manage the potential complications. The dentist will be able to tackle cases involving only 1mm of native bone under the maxillary sinus with ease and be able to place implants simultaneously. Immediate extraction and implant cases involving sinus augmentations are also discussed.
Dr. Donald Callan has a private practice limited to periodontics with an emphasis on tissue regeneration and implant dentistry. He is Assistant Clinical Professor, Department of Periodontics at Louisiana State University.

Rezno Casellini is a Master Dental Technologist, trained in Switzerland where his family has been in the dental industry for four generations. He is Instructor of Restorative Dentistry at Loma Linda University.

Dr. Leon Chen, DMD, MS

Dr. Jennifer Cha is the President of the Dental Implant Institute of Las Vegas. She is a Fellow and Diplomate of the International Congress of Oral Implantologists, one of only three dentists in Las Vegas to be awarded this esteemed honor. Dr. Cha utilizes her expertise in dental implants, both surgical and restorative, and specifically in full mouth reconstruction of complicated dental implant cases, to offer the most advanced care to her patients through a revolutionary procedure combining 5 surgeries into one surgical visit that is less invasive, less painful, with a faster healing time and the highest rate of success.

Dr. Irfan Atcha, DDS

Dr. Irfan Atcha has been in private practice since 1996. Dr. Atcha is an expert in treating the dentally disastrous and the fearful patients with the latest techniques involving advanced Intravenous (IV) sedation. His advanced training in the field of Dental Implantology, Occlusion, and TMJ disorder allows this him to provide care for the dentally disastrous patients.
Dr. Naruse has been performing implant surgery since 1985 and has been running his own periodontal clinic for 22 years. He is an authority on Vertical Bone Augmentation in Japan, and regularly gives lectures nationwide on GBR and Sinus Lifting. He is a Specialist in the Japanese Society of Oral Implantology, DGZI and Diplomate of ICOI.

Dr. Hahn is President of The American Board Of Oral Implantology And Implant Dentistry. Developed implant devices and techniques. An example The Replace implant from Nobelbiocare. Honored Fellow of The American Academy of Implant Dentistry, Diplomate of the ICOI, Fellow of the American Academy Of General Dentistry, Diplomate of The Academy Of Implant Prosthodontics, clinical director of implant dentistry Chicago Center-Moscow, Russia and involved in various clinical studies.

Len Conner is the Tech Services & Group Product Manager for Americas at Zimmer dental. He has been a technical expert for 24 years in Implant Dentistry.

Dr. Scott D. Ganz, D.M.D graduated from the University of Medicine and Dentistry - New Jersey Dental School. He completed a three-year specialty program in Maxillofacial Prosthetics at M.D. Anderson Cancer Center in Houston, TX. During this time Dr. Ganz was exposed to many different aspects of head and neck reconstruction, fabricating both intra-oral and extra-oral prostheses such as eyes, ears, noses, and etc. This was followed by 24 years of clinical experience (both surgical and restorative phases) with most major implant systems.

Dr. Arun K. Garg earned engineering and dental degrees from the University of Florida and then completed his residency training at the University of Miami Jackson Memorial Hospital. For nearly twenty years, Arun served as a full-time Professor of Surgery in the Division of Oral and Maxillofacial Surgery and as Director of Residency Training at the University of Miami School of Medicine. He was frequently recognized as “faculty member of the year” by his residents.
Dr. Jin Y. Kim was born in Korea. Dr. Kim then settled in California, where he completed a master degree in public health and oral biology, and a three-year specialty residency training program in periodontics and implant surgery at UCLA School of Dentistry. Dr. Kim also became board-certified by the American Board of Oral Implantology/Implant Dentistry (ABOI/ID), in 2006, making him a unique and rare dual board-certified specialist in the nation.

Dr. Jack Krauser has written numerous chapters in periodontal and/or implant related texts and authored or co-authored more than 20 articles in various publications. He is also on the editorial board of several journals and newsletters.

Dr. Robert E. Marx, D.D.S. Professor of Surgery and Chief of the Division of Oral and Maxillofacial Surgery at the University of Miami Miller School of Medicine, is widely known as an educator, researcher and innovative surgeon. He has pioneered new concepts and treatments for pathologies of the oral and maxillofacial area; as well as new techniques in reconstructive surgery. His many prestigious awards, including the Harry S. Archer Award, the William J. Giles Award, the Paul Bert Award, and the Donald B. Osbon Award, attest to his dedication and commitment to the field of oral and maxillofacial surgery.

Dr. Kurtzman is in private general practice in Silver Spring, Maryland and is a former Assistant Clinical Professor at the University of Maryland, Department of Endodontics, Prosthetics and Operative Dentistry.

Dr. Gregori M. Kurtzman, DDS is in private general practice in Silver Spring, Maryland and is a former Assistant Clinical Professor at the University of Maryland, Department of Endodontics, Prosthetics and Operative Dentistry.
Dr. Len Tolstunov has been practicing the specialty of oral and maxillofacial surgery. Dr. Tolstunov holds the part-time teaching position of an Associate Clinical Professor at the Pacific University, School of Dentistry. Dr. Tolstunov organized and leads two well-known implant study groups in San Francisco with for the general dentists to enhance their knowledge in new implant technology and restorative practice.

Dr. Astley E. Smith attended the University of Manitoba where he earned a Bachelor of Science Degree (B.Sc.) in Chemistry, a Masters of Science Degree (M.Sc.) in Biochemistry and a Doctor of Dental Medicine Degree (D.M.D).

Dr. Naruse has been performing implant surgery since 1985 and has been running his own periodontal clinic for 22 years. He is an authority on Vertical Bone Augmentation in Japan, and regularly gives lectures nationwide on GBR and Sinus Lifting. He is a Specialist in the Japanese Society of Oral Implantology, DGZI and Diplomate of ICOI.

Dr. Emil Verban has been placing implants for over 15 years and has developed and patented surgical products which greatly increase safety and precision for implant surgery.
